

Leave Management System (LMS) - Agile Project Documentation

Project Summary

The Leave Management System (LMS) is a role-based web and mobile-enabled application designed to digitize and streamline the leave process within an organization. It allows employees to submit leave requests, view leave balances, and track approval status. Managers can efficiently review, approve, or reject requests while maintaining visibility into team availability. HR personnel can configure leave types, generate reports, override requests, and maintain compliance with company policies. This system helps reduce manual errors, saves time, and ensures fair leave handling across departments.

Project Goals/Objectives

- Enable employees to easily apply for leave using a digital form.
- Provide real-time visibility into leave balances and status updates.
- Allow managers to efficiently approve or reject requests with notifications.
- Allow HR to configure leave types, rules, and override decisions when needed.
- Offer department-level monthly reports with export capabilities for auditing and analytics.
- Improve transparency, compliance, and operational efficiency.

User Roles

- Employee: Apply for leave, view balances, modify or cancel pending requests, view leave status.
- Manager: Review team leave requests, approve or reject, view team calendar, receive notifications.
- HR/Admin: Configure leave types and rules, override decisions, generate reports, view audit logs.

Tools & Methodology

- Development Approach: Agile (Scrum-based)
- Project Management Tool: Jira (for backlog management, user stories, and sprint planning)
- Modelling Tools:
 - Wireframes (UI representation)
 - Activity Diagrams (process modelling)
 - Flowcharts (workflow visualization)
- Deliverables: 12 Functional User Stories (LMS-01 to LMS-12), Wireframes, Diagrams

Feature Status Overview

User Story	Feature Title	Status	Story Points
LMS-01	Apply for Leave	✔ Complete	3
LMS-02	View Leave Balance	✔ Complete	2

LMS-03	View Pending Leave Requests (Manager)	→ To-Do SOON	2
LMS-04	Approve/Reject Leave	✓ Complete	5
LMS-05	View Team Leave Calendar	● In Progress	3
LMS-06	Configure Leave Types and Rules	● In Progress	5
LMS-07	Generate Monthly Leave Reports	✓ Complete	5
LMS-08	Cancel or Modify Leave Request	✓ Complete	5
LMS-09	Manager Notification on Leave	✓ Complete	3
LMS-10	HR Override Leave Request	✓ Complete	8
LMS-11	View Leave Request Status	✓ Complete	2
LMS-12	View Company Leave Policy	→ To-Do SOON	2

Jira Backlog – LMS User Stories Overview

This screenshot displays the **Jira Backlog** for the *Leave Management System (LMS)* project. It includes **12 functional user stories (LMS-01 to LMS-12)** covering the complete leave lifecycle for employees, managers, and HR teams.

Each story is currently marked as **"To Do"**, prepared for sprint planning and development. These stories are grouped under the epic **"Leave Management System"**, ensuring all requirements stay organized and traceable.

The backlog ensures:

- A clear overview of all features
- Easy prioritization based on user roles and complexity
- Smooth collaboration for Agile sprint planning

Sprint Planning Note:

“I used this Jira backlog to plan feature delivery across **two sprints** — prioritizing **employee-focused functionalities** like Apply for Leave, View Leave Balance, and

Modify Request in **Sprint 1**, followed by **manager and HR workflows** like Approval, Override, and Reporting in **Sprint 2**

User Stories :

✅ LMS-01: Apply for Lave:

Description

✅ LMS-01: Apply for Leave

User Story

As an employee, I want to apply for leave through an online form, so that I can request time off without going through a manual process.

Acceptance Criteria

1. The leave application form must include the following fields:
 - Leave Type (dropdown: Casual, Sick, Earned, Unpaid)
 - Start Date and End Date (calendar picker)
 - Number of Days (auto-calculated based on dates but editable)
 - Reason for Leave (mandatory text box)
2. The system must validate:
 - Start date is today or a future date (no past dates allowed)
 - Selected dates do not exceed the employee's available leave balance for the selected type
 - Leave type-specific policies (e.g., max 3 casual leaves/month)
3. If any validation fails, the system shall display an appropriate inline error message.
4. Upon successful submission:
 - A confirmation message is displayed: "Leave request submitted successfully."
 - Leave status is set to "Pending Approval"
 - An email/notification is sent to the reporting manager
 - Entry is added to the employee's leave request history.

Wireframe Description:

A mobile form interface with dropdown for leave type, calendar date pickers for start and end dates, auto-calculated number of days, and a required textbox for reason. Submission triggers a success message and sets status to "Pending Approval".

The wireframe shows a mobile application interface for applying for leave. The title 'Apply for Leave' is at the top. Below it are several form fields: 'Leave Type' with a dropdown menu showing 'Select', 'Start Date' and 'End Date' with calendar icons, 'Number of Days' with a text input, and 'Reason for leave' with a larger text area. Below these fields is a placeholder for an 'Error message'. A 'Submit' button is positioned below the error message. At the bottom of the form, a success message reads 'Leave request submitted successfully.' The entire form is enclosed in a rounded rectangle with a thin border, and a standard mobile navigation bar is at the very bottom.

✓ LMS-02: View Leave Balance

Description

✓ LMS-02: View Leave Balance

User Story

As an employee, I want to view my remaining leave balance, so that I can plan my vacations or leaves accordingly.

Acceptance Criteria

1. The employee dashboard must display leave balances grouped by type (e.g., Casual: 4 days, Sick: 2 days).
2. Leave balances shall be presented in a table or card-based widget format for clarity.
3. The balance values must update automatically when:
 - A leave is approved (deducted)
 - New leave is credited (monthly/yearly)
 - Carry-forward is applied
4. The system shall provide an option to:
 - Download the leave balance as a PDF or Excel file
 - Print the leave balance summary
5. All balance updates must be audit-logged with timestamps and trigger IDs (credit/debit sources).

Wireframe Description:

A mobile dashboard displaying leave balances in card format per leave type (Casual, Sick, etc.), with a download/print icon at the top. Balances update dynamically based on leave actions or policies.

✓ LMS-03: View Pending Leave Requests (Manager)

Description

✓ LMS-03: View Pending Leave Requests (Manager)

User Story

As a manager, I want to see all pending leave requests from my direct reports so I can review them before approving.

Acceptance Criteria

1. The system must display a list of all pending leave requests submitted by the manager's direct reports.
2. Each leave request shall display:
 - Employee Name
 - Leave Type
 - Dates Requested
 - Reason
 - Request Submission Date
3. Managers can filter or sort the list by:
 - Leave Type
 - Submission Date
 - Leave Duration
4. Each row in the request list must include action buttons:
 - View Details
 - Approve
 - Reject
5. Only requests with status "Pending" are shown by default.
6. Clicking "View Details" opens a detailed view of the request in a modal or new window.

Wireframe Description:

A scrollable list view for managers with cards showing pending leave requests: employee name, dates, type, and quick "Approve/Reject" options. Filters may include date range or team.

✓ LMS-04: Approve/Reject Leave (Manager)

Description

✓ LMS-04: Approve/Reject Leave (Manager)

User Story

As a manager, I want to approve or reject leave requests so that I can manage team availability efficiently.

Acceptance Criteria

1. Manager can approve or reject leave requests from the pending request list or from the detailed view.
2. On clicking "Approve":
 - Leave status changes to "Approved"
 - Email/notification is sent to the employee
 - Decision timestamp and manager's name are logged
3. On clicking "Reject":
 - A modal appears asking for a rejection reason (mandatory)
 - Upon submission, status changes to "Rejected"
 - Email/notification is sent to the employee with the reason
 - Rejection reason, timestamp, and manager identity are recorded
4. Once a decision is taken (Approve/Reject), the request becomes read-only.
5. All actions are audit-logged for future reference.

Wireframe Description:

A detailed view of a selected leave request with employee info, leave type, dates, reason, and buttons for **Approve** and **Reject**. Optionally includes a comment box and confirmation dialog.

✓ LMS-05: View Team Leave Calendar

Description

✓ LMS-05: View Team Leave Calendar

User Story

As a manager, I want to see a calendar view of my team's approved leaves so I can manage workloads and avoid resource conflicts.

Acceptance Criteria

- Calendar shows employee leave entries with:
 - Color-coded leave types
 - Employee names and durations
- Filters: Department, Role, Team, Leave Type.
- Hover-over shows Name, Leave Type, Duration.
- Toggle between monthly and weekly view.
- Calendar updates in real-time when leaves are approved/canceled.

Wireframe Description:

A calendar interface showing team members' approved leaves color-coded by leave type. Offers weekly/monthly views and tap-to-view leave details for each day.

✓ LMS-06: Configure Leave Types and Rules (HR)

Description

✓ LMS-06: Configure Leave Types and Rules (HR)

User Story

As an HR admin, I want to create and manage different leave types and their rules so that the system enforces policy correctly.

Acceptance Criteria

- Admin panel allows: Add/Edit/Deactivate leave types.
- Leave type settings include:
 - Name
 - Max Annual Limit
 - Monthly Limit (optional)
 - Carry-forward (Yes/No, Max Days)
 - Encashment (Yes/No)
- Rules can be customized for departments, roles, employee categories.
- System enforces rules during leave application.
- All changes logged with timestamps and admin identity.

Wireframe Description:

A settings-style screen for HR where each leave type is listed with editable fields: allowed days, accrual cycle, carry-forward rules, and restrictions. Includes "Save" and "Reset" buttons.

The wireframe shows a mobile application screen titled "Configure Leave Type" with an information icon (i) in the top right corner. The screen contains the following elements:

- Name:** A text input field.
- Max Annual Limit:** A dropdown menu currently showing "Approved".
- Monthly Limit (optional):** A text input field.
- Carry-forward:** A radio button.
- Encashment:** A radio button.
- Buttons:** Two buttons at the bottom, "Save" and "Deactivate".

The bottom of the screen features a standard mobile navigation bar with four icons: a home icon, a menu icon (three horizontal lines), a square icon, and a circular icon.

✓ LMS-07: Generate Monthly Leave Reports (HR)

Description

✓ LMS-07: Generate Monthly Leave Reports (HR)

User Story

As an HR user, I want to generate downloadable monthly leave reports for departments so that I can analyze usage trends and ensure compliance.

Acceptance Criteria

- System allows HR users to select filters:
 - Date Range
 - Department
 - Leave Type
- Report includes:
 - Department-wise leave summary
 - Leave type-wise usage statistics
 - Count of Approved vs. Rejected requests
 - List of Top Leave Takers (sorted by days taken)
- Export options:
 - Excel (.xls)
 - PDF
 - Email the report directly from the system
- Reports are visually structured and mobile-friendly
- Exported reports include date of generation and selected filters
- All generated reports are audit-logged.

Wireframe Description:

Report dashboard with filters for department, leave type, and date range. Displays charts or tables summarizing leave usage, top leave takers, and download buttons for Excel/PDF.

✓ LMS-08: Cancel or Modify Pending Leave Request (Employee)

Description

✓ LMS-08: Cancel or Modify Pending Leave Request (Employee)

User Story

As an employee, I want to cancel or modify a leave request before it's approved so I can correct errors or change plans.

Acceptance Criteria

- Modify and Cancel options are visible only if leave status is "Pending"
- On clicking **Modify**:
 - Leave form is pre-populated with existing values
 - Employee can edit leave details and resubmit
 - Updated request status remains "Pending"
- On clicking **Cancel**:
 - A confirmation popup is shown
 - On confirmation, status updates to "Canceled"
- All modifications and cancellations:
 - Are logged with timestamp
 - Are visible in the audit trail
 - Include user identity and updated fields.

Wireframe Description:

Mobile view with a heading "Cancel or Modify Leave Request?" showing existing leave details: **Dates**, **Type**, **Reason**, **Status**. Two main buttons: **Modify** (reopens editable form), and **Cancel** (triggers confirmation popup). A **Close** option is available at the bottom.

The wireframe shows a mobile application interface for managing leave requests. The title is "Cancel or Modify Leave Request?". Below the title, there are four rows of information, each with a label and a value: "Dates" with "03-06 Apr 2023", "Type" with "SICK", "Reason" with "Fever", and "Status" with "PENDING". At the bottom of the screen, there are two buttons: "Modify" and "Cancel", and a "Close" link centered below them.

Dates	03-06 Apr 2023
Type	SICK
Reason	Fever
Status	PENDING

[Close](#)

✓ LMS-09: Manager Notification on Leave Application

Description

✓ LMS-09: Manager Notification on Leave Application

User Story

As a manager, I want to get an instant notification when someone applies for leave so I can review requests promptly.

Acceptance Criteria

- Email notification is sent instantly after leave submission
- Email includes:
 - Employee name
 - Leave dates, leave type, and reason
 - Direct link to leave approval screen
- Notification also appears in manager's dashboard/notification center
- Notifications marked as read/unread
- Duplicate requests grouped or listed with timestamps.

Wireframe Description:

Notification screen for managers showing **Employee Name**, **Leave Dates**, **Type**, and **Reason** inside a card layout. A clear **Open Approval Screen** button is provided to take direct action from the notification.

✓ LMS-10: HR Override Leave Request

Description

✓ LMS-10: HR Override Leave Request

User Story

As an HR user, I want to override a leave request (approved or rejected) in special cases so I can correct discrepancies or apply exceptions.

Acceptance Criteria

- Feature is accessible only to HR users
- HR can:
 - Change status (e.g., Approved → Rejected or vice versa)
 - Edit leave dates or leave type
- System requires a mandatory override reason before submission
- On override:
 - A log entry is created capturing:
 - Previous values
 - Updated values
 - Timestamp
 - HR name and override reason
- The overridden request is flagged as “Modified by HR” in audit history.

Wireframe Description:

A structured form for HR to override leave requests. Shows employee details, leave info, and current status. Two buttons: **Change Status** and **Edit Dates**. Below, a **Reason for Override** input box and a **Confirm** button for submitting the override with mandatory justification.

The wireframe shows a mobile app interface for 'HR Override Leave Request'. It displays employee details for 'John Doe', leave dates 'May 5, 2024 - May 8 2024', leave type 'Casual', and status 'Rejected'. There are two buttons: 'Change Status' and 'Edit Dates'. Below these is a 'Reason for Override' section with a text input field and a 'Confirm' button.

HR Override Leave Request	
John Doe	
Dates	May 5, 2024 - May 8 2024
Leave	Casual
Status	Rejected
Change Status	Edit Dates
Reason for Override	
Confirm	

✓ LMS-11: View Leave Request Status (Employee)

Description

✓ LMS-11: View Leave Request Status (Employee)

User Story

As an employee, I want to see the status of my leave requests so that I'm aware of approval progress and final decisions.

Acceptance Criteria

- Leave requests are listed in reverse chronological order
- Each request displays:
 - Dates (from-to)
 - Leave Type
 - Status: Pending, Approved, Rejected, or Canceled
 - Manager comments (if available)
 - Last updated timestamp
- Requests with "Rejected" or "Canceled" status show reasons/comments if entered
- Responsive layout for mobile and desktop views.

Wireframe Description:

A scrollable mobile view listing past leave requests in **reverse chronological order**. Each card displays: **Dates**, **Leave Type**, **Status Badge** (Pending, Approved, Rejected, Cancelled), optional **Manager Comments**, and **Last Updated Timestamp**. Tapping a request expands full details.

✅ LMS-12: View Company Leave Policy (New Employee)

Description

✅ LMS-12: View Company Leave Policy (New Employee)

User Story

As a new employee, I want to access the company's leave policy so that I understand rules around types of leaves, limits, and procedures.

Acceptance Criteria

- Leave Policy is accessible via a "Leave Policy" link in the dashboard
- The policy can be viewed as:
 - HTML page (mobile responsive)
 - PDF (downloadable)
- The policy content includes:
 - Leave types and eligibility
 - Carry-forward and encashment rules
 - Approval workflow (step-by-step)
- The HTML version is readable on both desktop and mobile devices
- System ensures the latest version of the policy is always shown.

Wireframe Description:

Dashboard link labelled "**Leave Policy**" leads to a mobile-responsive HTML page. The layout includes collapsible sections or tabs for: **Leave Types, Eligibility, Carry-forward & Encashment Rules**, and **Approval Workflow**. At the top or bottom, a button allows **Download as PDF**.

Figure 5: View Leave Balance – Activity Flow

Figure 6: Generate Leave Reports (HR) – Activity Flow

My Role & Contributions

As the Business Analyst for the LMS project, my contributions included:

- Gathering and documenting requirements from employees, managers, and HR stakeholders.
- Writing detailed user stories with acceptance criteria.
- Creating wireframes and activity flow diagrams for all core functionalities.
- Setting up the Jira backlog, assigning story points, and planning delivery across sprints.
- Collaborating with developers and testers to clarify requirements.
- Ensuring Agile documentation and progress tracking were maintained.

Lessons Learned

- Clear acceptance criteria reduce development ambiguity.
- Wireframes and flow diagrams improve stakeholder understanding.
- Iterative delivery allows fast feedback and adjustments.

Conclusion

- The Leave Management System (LMS) project successfully addresses the need for a streamlined, transparent, and centralized leave management process. By digitizing leave requests, approvals, and HR oversight, it reduces manual work, improves compliance, and provides real-time visibility to all stakeholders. The Agile approach enabled incremental delivery, quick feedback incorporation, and stakeholder satisfaction. Future enhancements could include payroll integration, mobile app access, and analytics for leave trends.
