

Leave Management System (LMS)

Agile Project Documentation

Agile Project — Business Analysis Portfolio

12 User Stories (LMS-01 to LMS-12)

Document Version: 1.0

1. Project Overview

The Leave Management System (LMS) is a role-based web and mobile-enabled application designed to digitize and streamline the leave process within an organization. It allows employees to submit leave requests, view leave balances, and track approval status. Managers can efficiently review, approve, or reject requests while maintaining visibility into team availability. HR personnel can configure leave types, generate reports, override requests, and maintain compliance with company policies.

Project Objectives

- Enable employees to easily apply for leave using a digital form.
- Provide real-time visibility into leave balances and status updates.
- Allow managers to efficiently approve or reject requests with notifications.
- Allow HR to configure leave types, rules, and override decisions when needed.
- Offer department-level monthly reports with export capabilities for auditing and analytics.
- Improve transparency, compliance, and operational efficiency.

User Roles

Role	Responsibilities
Employee	Apply for leave, view balances, modify or cancel pending requests, view leave status.
Manager	Review team leave requests, approve or reject, view team calendar, receive notifications.
HR / Admin	Configure leave types and rules, override decisions, generate reports, view audit logs.

Tools & Methodology

- Development Approach: Agile (Scrum-based)
- Project Management Tool: Jira (backlog management, user stories, sprint planning)
- Modelling Tools: Wireframes (UI representation), Activity Diagrams (process modelling), Flowcharts (workflow visualization)
- Deliverables: 12 Functional User Stories (LMS-01 to LMS-12), Wireframes, Diagrams

2. Feature Status Overview

User Story	Feature Title	Status	Story Points
LMS-01	Apply for Leave	Complete	3
LMS-02	View Leave Balance	Complete	2
LMS-03	View Pending Leave Requests (Manager)	To-Do	2
LMS-04	Approve/Reject Leave (Manager)	Complete	5
LMS-05	View Team Leave Calendar	In Progress	3
LMS-06	Configure Leave Types and Rules (HR)	In Progress	5
LMS-07	Generate Monthly Leave Reports (HR)	Complete	5
LMS-08	Cancel or Modify Pending Leave Request (Employee)	Complete	5
LMS-09	Manager Notification on Leave Application	Complete	3
LMS-10	HR Override Leave Request	Complete	8
LMS-11	View Leave Request Status (Employee)	Complete	2
LMS-12	View Company Leave Policy (New Employee)	To-Do	2

3. Jira Backlog — LMS User Stories Overview

This screenshot displays the Jira Backlog for the Leave Management System (LMS) project. It includes 12 functional user stories (LMS-01 to LMS-12) covering the complete leave lifecycle for employees, managers, and HR teams.

Each story is currently marked as “To Do”, prepared for sprint planning and development. These stories are grouped under the epic “Leave Management System”, ensuring all requirements stay organized and traceable.

The backlog ensures:

- A clear overview of all features
- Easy prioritization based on user roles and complexity
- Smooth collaboration for Agile sprint planning

Sprint Planning Note

“I used this Jira backlog to plan feature delivery across two sprints — prioritizing employee-focused functionalities like Apply for Leave, View Leave Balance, and Modify Request in Sprint 1, followed by manager and HR workflows like Approval, Override, and Reporting in Sprint 2.”

4. User Stories & Wireframes

LMS-01: Apply for Leave

Status: Complete

Story Points: 3

User Story

As an employee, I want to apply for leave through an online form, so that I can request time off without going through a manual process.

Acceptance Criteria

- The leave application form includes Leave Type, Start Date, End Date, Number of Days (auto-calculated but editable), and Reason for Leave.
- System validates that the start date is today or a future date (no past dates allowed).
- System validates that selected dates do not exceed the employee's available leave balance for the selected type.
- System enforces leave-type-specific policies (e.g., maximum 3 casual leaves/month).
- Validation failures display an inline error message.
- On successful submission: a confirmation message is shown, status is set to 'Pending Approval', a notification is sent to the reporting manager, and the entry is added to the employee's leave request history.

The wireframe shows a mobile application interface for applying for leave. The title bar is dark blue with the text 'Apply for Leave'. Below the title bar, the form fields are as follows:

- Leave Type:** A dropdown menu with 'Select' as the placeholder.
- Start Date:** A text input field with a calendar icon on the right.
- End Date:** A text input field with a calendar icon on the right.
- Number of Days:** A text input field with the value 'Auto-calculated'.
- Reason for Leave:** A large text area for the user to provide details.

Below the form fields, there is a small note: '* All fields are mandatory'. At the bottom of the form is a dark blue 'Submit' button. Below the button is a green banner with the text 'Leave request submitted successfully'. The mobile interface includes a home indicator bar at the very bottom.

LMS-02: View Leave Balance

Status: Complete

Story Points: 2

User Story

As an employee, I want to view my remaining leave balance, so that I can plan my vacations or leaves accordingly.

Acceptance Criteria

- The employee dashboard displays leave balances grouped by type (e.g., Casual: 4 days, Sick: 2 days).
- Leave balances are presented in a table or card-based widget for clarity.
- Balance values update automatically when a leave is approved (deducted), new leave is credited, or carry-forward is applied.
- The system provides an option to download the leave balance as PDF/Excel or print it.
- All balance updates are audit-logged with timestamps and trigger IDs (credit/debit sources).

LMS-03: View Pending Leave Requests (Manager)

Status: To-Do

Story Points: 2

User Story

As a manager, I want to see all pending leave requests from my direct reports so I can review them before approving.

Acceptance Criteria

- The system displays a list of all pending leave requests submitted by the manager's direct reports.
- Each request shows Employee Name, Leave Type, Dates Requested, Reason, and Request Submission Date.
- Managers can filter or sort the list by Leave Type, Submission Date, or Leave Duration.
- Each row includes action buttons: View Details, Approve, Reject.
- Only requests with status 'Pending' are shown by default.
- Clicking 'View Details' opens a detailed view of the request in a modal or new window.

LMS-04: Approve/Reject Leave (Manager)

Status: Complete

Story Points: 5

User Story

As a manager, I want to approve or reject leave requests so that I can manage team availability efficiently.

Acceptance Criteria

- Manager can approve or reject leave requests from the pending request list or from the detailed view.
- On 'Approve': leave status changes to 'Approved', a notification is sent to the employee, and the decision timestamp and manager's name are logged.
- On 'Reject': a mandatory reason is required; status changes to 'Rejected'; the employee is notified with the reason.
- Once a decision is taken (Approve/Reject), the request becomes read-only.
- All actions are audit-logged for future reference.

The mockup shows a mobile application interface for managing leave requests. At the top, a dark blue header bar contains the title 'Approve / Reject Leave'. Below the header, the form is organized into sections. The first section, 'Employee Name', features a text input field with 'John Smith' entered. The second section, 'Leave Status', includes a dropdown menu currently set to 'Pending'. Below this, a read-only text field displays 'Dates: 12 Jun - 14 Jun (Sick Leave)'. The next section, 'Comments (required if rejecting)', has a large text input area. At the bottom of the form are two prominent buttons: a dark blue 'Approve' button and a white 'Reject' button with a blue border. The entire interface is framed within a rounded rectangle representing a smartphone, with a standard Android navigation bar at the very bottom.

LMS-05: View Team Leave Calendar

Status: In Progress

Story Points: 3

User Story

As a manager, I want to see a calendar view of my team's approved leaves so I can manage workloads and avoid resource conflicts.

Acceptance Criteria

- Calendar shows employee leave entries with color-coded leave types, employee names, and durations.
- Filters are available for Department, Role, Team, and Leave Type.
- Hovering over an entry shows Name, Leave Type, and Duration.
- Users can toggle between monthly and weekly views.
- The calendar updates in real time when leaves are approved or cancelled.

LMS-06: Configure Leave Types and Rules (HR)

Status: In Progress

Story Points: 5

User Story

As an HR admin, I want to create and manage different leave types and their rules so that the system enforces policy correctly.

Acceptance Criteria

- Admin panel allows HR to Add, Edit, or Deactivate leave types.
- Leave type settings include Name, Max Annual Limit, Monthly Limit (optional), Carry-forward (Yes/No, Max Days), and Encashment (Yes/No).
- Rules can be customized for departments, roles, or employee categories.
- The system enforces configured rules during leave application.
- All changes are logged with timestamps and admin identity.

The image shows a mobile application interface for configuring leave types. The screen has a dark blue header with the title 'Configure Leave Type' and an information icon. Below the header, there are several input fields: 'Name' with a placeholder 'e.g. Casual Leave', 'Max Annual Limit' with a dropdown menu showing '12', and 'Monthly Limit (optional)' with a text input showing '1'. There are two toggle switches: 'Carry-forward' (disabled) and 'Encashment' (enabled). At the bottom, there are two buttons: 'Save' and 'Deactivate'. The screen is framed by a black border, and the bottom of the phone shows standard Android navigation icons.

LMS-07: Generate Monthly Leave Reports (HR)

Status: Complete

Story Points: 5

User Story

As an HR user, I want to generate downloadable monthly leave reports for departments so that I can analyze usage trends and ensure compliance.

Acceptance Criteria

- HR can filter reports by Date Range, Department, and Leave Type.
- Report includes department-wise leave summary, leave-type-wise usage statistics, count of approved vs. rejected requests, and a list of top leave takers.
- Reports can be exported as Excel (.xls) or PDF, or emailed directly from the system.
- Reports are visually structured and mobile-friendly.
- Exported reports include the date of generation and the selected filters.
- All generated reports are audit-logged.

LMS-08: Cancel or Modify Pending Leave Request (Employee)**Status:** Complete**Story Points:** 5**User Story**

As an employee, I want to cancel or modify a leave request before it's approved so I can correct errors or change plans.

Acceptance Criteria

- Modify and Cancel options are visible only if leave status is 'Pending'.
- On 'Modify': the leave form is pre-populated with existing values; the employee can edit details and resubmit; the updated request status remains 'Pending'.
- On 'Cancel': a confirmation popup is shown; on confirmation, status updates to 'Cancelled'.
- All modifications and cancellations are logged with a timestamp, are visible in the audit trail, and include user identity and updated fields.

The image shows a mobile application interface for managing leave requests. The title bar at the top is dark blue with the text "Cancel or Modify Leave" in white. Below the title bar is a table with two columns: "Field" and "Value". The table contains the following data:

Field	Value
Dates	03-06 Apr 2023
Type	Sick
Reason	Fever
Status	Pending

Below the table are two buttons: "Modify" (dark blue) and "Cancel" (white with a dark blue border). Below the buttons is a link labeled "Close" in blue. At the bottom of the screen is a navigation bar with four icons: a triangle, a hamburger menu, a square, and a circle.

LMS-09: Manager Notification on Leave Application

Status: Complete

Story Points: 3

User Story

As a manager, I want to get an instant notification when someone applies for leave so I can review requests promptly.

Acceptance Criteria

- An email notification is sent instantly after leave submission.
- The email includes Employee Name, Leave Dates, Leave Type, Reason, and a direct link to the leave approval screen.
- The notification also appears in the manager's dashboard/notification center.
- Notifications can be marked as read/unread.
- Duplicate requests are grouped or listed with timestamps.

LMS-10: HR Override Leave Request

Status: Complete

Story Points: 8

User Story

As an HR user, I want to override a leave request (approved or rejected) in special cases so I can correct discrepancies or apply exceptions.

Acceptance Criteria

- This feature is accessible only to HR users.
- HR can change the request status (e.g., Approved to Rejected or vice versa) and edit leave dates or leave type.
- The system requires a mandatory override reason before submission.
- On override, a log entry captures previous values, updated values, timestamp, HR name, and override reason.
- The overridden request is flagged as 'Modified by HR' in the audit history.

The image shows a mobile application interface for an "HR Override Leave Request". The screen has a dark blue header with the title "HR Override Leave Request". Below the header, there is a section for "Employee" with a text input field containing "John Doe". Underneath, it displays "Dates: 5 May 2024 - 8 May 2024 | Type: Casual | Status: Rejected". There are two buttons: "Change Status" and "Edit Dates". Below these is a section for "Reason for Override (mandatory)" with a large text input field. At the bottom of the form is a dark blue button labeled "Confirm Override". The mobile interface includes a status bar at the top and a navigation bar at the bottom with icons for back, home, and other functions.

LMS-11: View Leave Request Status (Employee)

Status: Complete

Story Points: 2

User Story

As an employee, I want to see the status of my leave requests so that I'm aware of approval progress and final decisions.

Acceptance Criteria

- Leave requests are listed in reverse chronological order.
- Each request displays Dates, Leave Type, Status (Pending, Approved, Rejected, or Cancelled), Manager comments (if available), and Last Updated Timestamp.
- Requests with 'Rejected' or 'Cancelled' status show reasons/comments if entered.
- The layout is responsive for both mobile and desktop views.

LMS-12: View Company Leave Policy (New Employee)

Status: To-Do

Story Points: 2

User Story

As a new employee, I want to access the company's leave policy so I understand rules around types of leaves, limits, and procedures.

Acceptance Criteria

- The Leave Policy is accessible via a 'Leave Policy' link in the dashboard.
- The policy can be viewed as a mobile-responsive HTML page or downloaded as a PDF.
- The policy content includes Leave Types and Eligibility, Carry-forward and Encashment Rules, and Approval Workflow (step-by-step).
- The HTML version is readable on both desktop and mobile devices.
- The system always shows the latest version of the policy.

5. Activity Diagrams

The following activity diagrams model the step-by-step process flow for the core LMS interactions, complementing the user stories and wireframes above.

Figure 1: Apply for Leave – Activity Flow

Figure 2: Manager Approves or Rejects Leave – Activity Flow

Figure 3: Cancel or Modify Pending Leave – Activity Flow

Figure 4: HR Overrides Leave Request – Activity Flow

Figure 5: View Leave Balance – Activity Flow

Figure 6: Generate Leave Reports (HR) – Activity Flow

6. My Role & Contributions

As the Business Analyst for the LMS project, my contributions included:

- Gathering and documenting requirements from employees, managers, and HR stakeholders.
- Writing detailed user stories with acceptance criteria.
- Creating wireframes and activity flow diagrams for all core functionalities.
- Setting up the Jira backlog, assigning story points, and planning delivery across sprints.
- Collaborating with developers and testers to clarify requirements.
- Ensuring Agile documentation and progress tracking were maintained.

7. Lessons Learned

- Clear acceptance criteria reduce development ambiguity.
- Wireframes and flow diagrams improve stakeholder understanding.
- Iterative delivery allows fast feedback and adjustments.

8. Conclusion

The Leave Management System (LMS) project successfully addresses the need for a streamlined, transparent, and centralized leave management process.

By digitizing leave requests, approvals, and HR oversight, it reduces manual work, improves compliance, and provides real-time visibility to all stakeholders.

The Agile approach enabled incremental delivery, quick feedback incorporation, and stakeholder satisfaction.

Future enhancements could include payroll integration, mobile app access, and analytics for leave trends.
